Surgical Components

All Ponto implants are of the wide 4.5 mm diameter design, with the same universal implant-abutment interface and are therefore fully compatible with existing instruments and abutments.

All surgical components are delivered sterile. All abutments have interface enabling implant stability measurements using resonance frequency analysis.

Ponto BHX implants (∅ 4.5 mm)

	M52166 Ponto BHX implant, 3 mm, with abutment, 6 mm	The Ponto BHX implant, 3 mm, with a 6 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.
	M52167 Ponto BHX implant, 3 mm, with abutment, 9 mm	The Ponto BHX implant, 3 mm, with a 9 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.
	M52168 Ponto BHX implant, 4 mm, with abutment, 6 mm	The Ponto BHX implant, 4 mm, with a 6 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.
	M52169 Ponto BHX implant, 4 mm, with abutment, 9 mm	The Ponto BHX implant, 4 mm, with a 9 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.
	M52170 Ponto BHX implant, 4 mm, with abutment, 12 mm	The Ponto BHX implant, 4 mm, with a 12 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.
	M52171 Ponto BHX implant, 4 mm, with abutment, 14 mm	The Ponto BHX implant, 4 mm, with a 14 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.
	M52172 Ponto BHX implant, 3 mm	The Ponto BHX implant, 3 mm, with a pre-mounted implant adapter is used in the two-stage surgical procedure in case of insufficient bone depth for the 4 mm implant. The implant adapter is a disposable item that is removed after implant insertion.
	M52173 Ponto BHX implant, 4 mm	The Ponto BHX implant, 4 mm, with a pre-mounted implant adapter is used in the two-stage surgical procedure. The implant adapter is a disposable item that is removed after implant insertion.

Wide implants (∅ 4.5 mm)

M51140
Wide implant, 3 mm,
with abutment, 6 mm

The Wide implant, 3 mm, with a 6 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.

M51141
Wide implant, 3 mm,
with abutment, 9 mm

The Wide implant, 3 mm, with a 9 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.

M51136
Wide implant, 4 mm,
with abutment, 6 mm

The Wide implant, 4 mm, with a 6 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.

M51137
Wide implant, 4 mm,
with abutment, 9 mm

The Wide implant, 4 mm, with a 9 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.

M51138
Wide implant, 4 mm,
with abutment, 12 mm

The Wide implant, 4 mm, with a 12 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.

M52065
Wide implant, 4 mm,
with abutment, 14 mm

The Wide implant, 4 mm, with a 14 mm pre-mounted abutment is used in the single-stage surgical procedure and consists of implant, abutment and connection screw.

M51142
Wide implant, 3 mm

The Wide implant, 3 mm, with a pre-mounted implant adapter is used in the two-stage surgical procedure in case of insufficient bone depth for the 4 mm implant. The implant adapter is a disposable item that is removed after implant insertion.

M51139
Wide implant, 4 mm

The Wide implant, 4 mm, with a pre-mounted implant adapter is used in the two-stage surgical procedure. The implant adapter is a disposable item that is removed after implant insertion.

Ponto abutments & cover screw

M50349
Abutment, 6 mm

The abutment, 6 mm, is delivered with a connection screw.

M50318
Abutment, 9 mm

The abutment, 9 mm, is delivered with a connection screw.

M51149
Abutment, 12 mm

The abutment, 12 mm, is delivered with a connection screw.

M52063
Abutment, 14 mm

The abutment, 14 mm, is delivered with a connection screw.

M50098
Cover screw hexagon

The cover screw hexagon is used in the two-stage surgical procedure or when a sleeper implant is placed. It is designed to cover the whole upper side of the implant flange and thereby safely protect the implant.

Surgical Instruments & Equipment

The disposable instruments are delivered sterile. All the drill shafts are between 26 and 30 mm long to facilitate correct orientation of the drill during the drilling procedure.

Disposable instruments

M50287
Guide drill, 3–4 mm

The guide drill has a removable spacer to allow drilling for placement of either 3 or 4 mm implants. The guide drill is used in combination with the wide countersinks.

M51144
Wide countersink, 3 mm

The wide countersink, 3 mm, is used after the initial guide drilling. It is designed to prevent countersinking of more than 0.3 mm and it creates a virtually invisible recess. The drill is marked with a W to indicate use with the Ponto implants with the wide 4.5 mm diameter design.

M51122
Wide countersink, 4 mm

The wide countersink, 4 mm, is used after the initial guide drilling. It is designed to prevent countersinking of more than 0.3 mm and it creates a virtually invisible recess. The drill is marked with a W to indicate use with the Ponto implants with the wide 4.5 mm diameter design.

M52080
Soft healing cap

The soft healing cap has a diameter of 26 mm, and holds the dressing in place while acting as protective mechanical barrier.

M50821
Healing cap

The healing cap has a diameter of 26 mm, and holds the dressing in place while acting as protective mechanical barrier.

220701
MONO Surgery kit

The MONO Surgery kit is used in the MONO procedure for single-stage installation of 4 mm Ponto implants with the wide 4.5 mm diameter design.

The kit consists of cannula, MONO drill, insertion indicator and soft healing cap.

192232
MIPS Surgery kit, 4 mm

The MIPS Surgery kit, 4 mm, is used in the MIPS single-stage procedure for installation of 4 mm Ponto implants with the wide 4.5 mm diameter design.

The kit consists of cannula, cannula guide drill, cannula widening drill, 4 mm, insertion indicator and soft healing cap.

192233
MIPS Back-up kit, 3 mm

The MIPS Back-up kit, 3 mm, is used in the MIPS single-stage procedure for installation of 3 mm Ponto implants with the wide 4.5 mm diameter design, as back-up in case of insufficient bone depth for the 4 mm implant.

The kit consists of cannula and cannula widening drill, 3 mm.

Equipment

Drilling equipment
It is important that the correct type of drilling equipment is used during the surgical procedure. The unit should be able to carry out the drilling with a drill bit speed of 1500–2000 rpm as well as the implant installation on a low speed setting, 15 rpm, and a torque setting between 10-50 Ncm depending on the bone quality. See Surgical Manual for correct settings and procedure.

We recommend the Implantmed drive unit supplied by W&H (www.wh.com) with the contra-angle handpiece 20:1. Please contact your local sales representative for more information.

Non-disposable instruments

M52074
Sterilization cassette

The sterilization cassette holds instruments in place during sterilization.

M52114
Silicone parts, sterilization cassette

Silicone spare parts kit for M52074.

M51690
Counter torque wrench

The counter torque wrench is used for counteracting the force when tightening or unscrewing the connection screw using the screwdriver. The counter torque wrench is also used for manual tightening in the single-stage procedure if needed.

M50230
Torque wrench

The torque wrench, scale 10–35 Ncm, is used to secure the correct torque when tightening the connection screw. It is used together with the handle with screwdriver.

M52143
Ruler

The ruler is used to assist in the selection of abutment length by providing a comparative guide between tissue thickness and Ponto abutment length.

	M52196 Double-ended dissector	The double-ended dissector is used for dissection and removal of the periosteum. The blunt side is also used for inspection of bone.
	M50437 Handle with screwdriver	The handle with screwdriver has replaceable bits and can be used together with the torque wrench. It is delivered with one screwdriver machine bit.
	M50384 Screwdriver, machine, 35 mm	The screwdriver machine bit can be used with both the handle with screwdriver and the drill equipment handpiece. The bit fits all the abutment connection screws and the implant adapter screws. The shaft is fitted according to ISO 1797-1.
	M51695 Abutment inserter, machine	The abutment inserter is used during the single-stage surgical procedure for inserting the implant with the pre-mounted abutment, using the drill equipment. The shaft has a hexagonal collar with a shaft fitted according to ISO 1797-1.
	M50386 Square fit connection, machine	The square fit connection is used for inserting the 3 and 4 mm implant with the pre-mounted implant adapter, using the drill equipment. The shaft is fitted according to ISO 1797-1.
	M50428 Sound processor indicator	The sound processor indicator is used on intact skin to illustrate the size of a sound processor in order to assess and enable marking of the appropriate implant site prior to incision.
	M50534 Screwdriver hexagon	The screwdriver hexagon is used for connecting and disconnecting the cover screw.

Ponto implants countersink guide 4 mm

Accessories

The Ponto System offers a wide range of accessories for specific patient requirements as well as for evaluation and testing situations.

Connectivity for Ponto 4 and Ponto 5 family

178509
ConnectClip

ConnectClip combines a Bluetooth headset and a microphone in one. It is a small device compatible with the Ponto 4 and Ponto 5 sound processors. ConnectClip streams sound directly from a wireless device, e.g. a smartphone, to the sound processor in high quality while also functioning as a wireless microphone and remote control.*

ConnectClip is a SBO Hearing A/S product.

169229
Remote Control 3.0

Remote Control 3.0 offers discreet and easy control over the Ponto 4 and Ponto 5 sound processors. Use it to adjust volume, change programmes or mute your devices.*

The Remote Control 3.0 is a SBO Hearing A/S product.

168628
TV Adapter 3.0

TV adapter 3.0 connects the Ponto 4 and Ponto 5 sound processors with the TV for wireless streaming of the TV sound directly to the sound processor.*

The TV Adapter 3.0 is a SBO Hearing A/S product.

191009
EduMic

EduMic is an educational solution which allows teachers to stream voice directly to several hearing device users in a classroom.

EduMic is an Oticon A/S product.

Oticon ON app
Download the free app from the App Store® or on Google Play™.

The Oticon ON app is an Oticon A/S product.

Oticon RemoteCare app
Download the free app from the App Store® or on Google Play™.

The Oticon RemoteCare app is a SBO Hearing A/S product.

Download on the App Store

Connectivity for the Ponto 3 family

124771
ConnectLine
TV Adapter 2.0

The ConnectLine TV adapter can be connected to a TV and can transmit the TV sound to the sound processor via the Oticon Medical Streamer.

*Only through the Oticon Medical Streamer.**

The ConnectLine TV Adapter 2.0 is an Oticon A/S product.

155372
Oticon Medical
Streamer, black

155373
Oticon Medical
Streamer, white

The Oticon Medical Streamer is a gateway to a range of different electronic devices. Different audio sources can be transmitted through the Oticon Medical Streamer to your sound processor. The Oticon Medical Streamer can also be used as a remote control to adjust the volume and change the programme in the sound processor.

The Oticon Medical Streamer is an Oticon A/S product.

108402
ConnectLine
Microphone

The ConnectLine Microphone is a discreet clip-on microphone that can connect wirelessly to the Oticon Medical Streamer, allowing the conversation partner's voice to be heard in the sound processor.

*Only through the Oticon Medical Streamer.**

The ConnectLine Microphone is an Oticon A/S product.

ConnectLine
Phone Adapter 2.0

128812
US version

127837
EU version

The ConnectLine Phone Adapter 2.0 can be connected to a telephone (private/domestic analogue) and can transmit the sound from the telephone to the sound processor via the Oticon Medical Streamer. In this way, the sound processor, in combination with the Oticon Medical Streamer, is turned into a wireless headset.

*Only through the Oticon Medical Streamer for the Ponto 3 family. For Ponto 4 and Ponto 5, ConnectClip connects the sound processor to the ConnectLine Phone Adapter.**

The ConnectLine Phone Adapter is an Oticon A/S product.

FM receiver

140-06-200-00
169-187 MHz

140-06-300-00
216-218 MHz

The Oticon Amigo R2 can be used with the Oticon Medical Streamer. With this multi-channel FM receiver, the user can benefit from the advanced solutions offered by the Amigo receiver and transmitters.

*Only through the Oticon Medical Streamer for the Ponto 3 family. For Ponto 4 and Ponto 5, EduMic connects the sound processor to FM systems.**

The Oticon Amigo R2 is an Oticon A/S product.

Oticon ConnectLine app
Download the free app from the App Store® or on Google Play™.

The Oticon ConnectLine app is an Oticon A/S product.

**Please contact your local sales representative for more information.*

Care & maintenance

890-01-156-06
Drying tub

The drying tub from Oticon can be used with a drying capsule to dry the sound processor, mainly in countries with high humidity.*

The drying tub is an Oticon A/S product.

784-40-001-06
Drying capsules
(pack of 6 pcs)

The drying capsules from Oticon can be used with the drying tub to dry the sound processor, mainly in countries with high humidity.*

The drying capsules are Oticon A/S products.

M50294
Abutment cover, black

M50290
Abutment cover, beige

The abutment cover is used to cover the abutment when the sound processor is not connected.

M50030
Cleaning brush

The cleaning brush is used to clean the outside and inside of the abutment.

M51177
Ponto Care kit

The Ponto Care kit can be used to facilitate cleaning of the Ponto System and to establish a good daily aftercare routine.

173365
Safety line

The safety line may be attached to the sound processor and the patient's clothing to reduce risk of loss or damage after initial fitting or during physical activity. The safety line features an elastic line and a retention clip, all in a transparent and discreet design.

890-60-232-00
MultiTool

The MultiTool is used for opening and closing the tamper-resistant lock on Ponto 5 SuperPower and on the Ponto 3 family devices. The MultiTool can also be used for removing the battery from the sound processors.

The MultiTool is an Oticon A/S product.

*Please contact your local sales representative for more information.

Miscellaneous

226490
Plug kit,
Ponto 5 SuperPower

204265
Plug kit,
Ponto 5 Mini and Ponto 4

The plug kit contains plugs for covering the programming socket and for side indication.

Each kit contains three blue, three red and three black plugs.

226557
Battery drawer kit,
Ponto 5 SuperPower

204269
Battery drawer kit,
Nailgrip
Ponto 4 and Ponto 5 Mini

204268
Battery drawer kit,
Tamper-resistant
Ponto 4 and Ponto 5 Mini

The kits for Ponto 4 and Ponto 5 Mini come in a nailgrip and in a tamper-resistant version. The battery drawers for Ponto 5 SuperPower only come in one version with a built-in tamper-resistant mechanism.

Each kit contains three battery drawers and a tool for removing the drawer.

165593
TAR tool

A tool for opening the tamper-resistant battery drawer on Ponto 4 and Ponto 5 Mini.

Stickers and skins for Ponto 4 and Ponto 5 family

197957
Stickers

The adhesive stickers can easily be applied to the sound processor to customise its appearance.

234062
Skin, Ponto Mini, turquoise/pink
225096
Skin, Ponto 5 SuperPower, turquoise/pink

206535
Skin, Ponto Mini, red/yellow
225097
Skin, Ponto 5 SuperPower, red/yellow

234063
Skin, Ponto Mini, light green/navy blue
225098
Skin, Ponto 5 SuperPower, light green/navy blue

234064
Skin, Ponto Mini, light blue/dark purple
225099
Skin, Ponto 5 SuperPower, light blue/dark purple

The skin can be easily placed on the sound processor to change the appearance. Each set consists of six skins in two colours, three of each colour. The skins for Ponto Mini fit both Ponto 4 and Ponto 5 Mini.

Stickers and skins for the Ponto 3 family

M52857
Stickers for regular processors, right
M52858
Stickers for regular processors, left
M52859
Stickers for Power and SuperPower processors, right
M52860

The adhesive stickers can be easily applied to the sound processor to customise its appearance.

M52561
Skins for regular processors, right
M52562
Skins for regular processors, left

M52563
Skins for Power and SuperPower processors, right
M52564
Skins for Power and SuperPower processors, left

The skin can be easily placed on the sound processor to change the appearance. Each set consists of five skins in different colours: cerise, turquoise, orange, navy blue and yellow.

M51844
Skins for regular processors, right
M51845
Skins for regular processors, left

M51846
Skins for Power and SuperPower processors, right
M51847
Skins for Power and SuperPower processors, left

The skin can be easily placed on the sound processor to change the appearance. Each set consists of five skins in different colours: pink, green, red, light blue and purple.

Accessories

Softbands & Ponto SoundConnector™

The Softband is intended for users who have not had implant surgery but can benefit from a bone conduction solution. The Softband consists of an adjustable elastic band with one or two Connectors for the sound processor(s). It has a safety release feature, designed to open if it gets caught.

The Softbands are available for unilateral and bilateral use. Softband 5 comes in two sizes - XS/S and M/L. Each Softband pack contains Connector Pads - three Connector Pads for the unilateral band and six Connector Pads for the bilateral bands.

Softband 5, unilateral
XS/S

- **227690** Softband 5, unilateral XS/S black
- **227691** Softband 5, unilateral XS/S dark brown
- **227692** Softband 5, unilateral XS/S light brown
- **227693** Softband 5, unilateral XS/S beige
- **227694** Softband 5, unilateral XS/S light blue
- **227695** Softband 5, unilateral XS/S pink
- **227696** Softband 5, unilateral XS/S navy blue
- **227697** Softband 5, unilateral XS/S red

Softband 5, unilateral
M/L

- **227686** Softband 5, unilateral M/L black
- **227687** Softband 5, unilateral M/L dark brown
- **227688** Softband 5, unilateral M/L light brown

Accessories

Display

231636
Ponto Trial Layer
Demonstration case

A demonstration case layer featuring the Ponto offer and accessories. Look-a-like products are included for ConnectClip and sound processors, but demo sound processors, test band/head band and Softband need to be ordered separately. The layer comes with a grey smart cover protecting the case.

207702
Ponto 4 layer
Demonstration case

A demonstration case layer featuring the Ponto 4 offer.
A ConnectClip look-a-like is included, but demo sound processors and implant/abutment need to be ordered separately.

188564
Ponto Demo stand
with abutment

An ear model with a Ponto abutment to which you can connect the sound processor. The model is made in transparent polymer and branded Oticon Medical. Sound processor needs to be ordered separately.

M50462
Test stand

The test stand has a removable test rod that can be used to demonstrate and practise connection and disconnection of the Ponto sound processors.

226485
Ponto 5 SuperPower sample
(Diamond Black)

226486
Ponto 5 Mini sample
(Diamond Black)

201341
Ponto 4 sample (Terracotta)

The Ponto sound processor samples with coupling can be used to demonstrate and practise connection and disconnection of the sound processors.

179435
Keyring, Ponto
Softband colours

The keyring with Oticon Medical logo features all 14 colours of the Ponto Softbands. Designed to facilitate demonstration of the different colour options available.

176986
Display stand
Ponto Softband

The Display stand with Oticon Medical logo features all 14 colours of the Ponto Softband. Designed to facilitate demonstration of the different colour options available. It also includes a hook that can be used for displaying a complete band.

200837
Ponto colour
sample kit

The kit contains six colour samples (look-a-likes) of Ponto Mini. Designed to facilitate demonstration of the different colour options available.

228236
Color selector, BAHS

The Color selector has colour chips that show the colour range of the Ponto sound processors.

Test

M50308
Head band

The head band can be used during pre-operative patient evaluation and also by patients who are unsuitable for implantation but who can benefit from using the Ponto sound processors as a traditional bone conductor.

M50104
Test band

The test band is used for short-term pre-operative patient evaluation and testing of the Ponto sound processors.

M50302
Test rod

The test rod is used for listening, testing and demonstrating the sound processor without connecting it to an abutment. Simply connect the sound processor to the test rod and press it against the head.

Fitting & Verification

Software

Genie Medical BAHS 2022.1

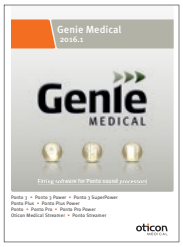
USB: **235639**

DVD: **235649**

Ponto 4, Ponto 5 Mini and Ponto 5 SuperPower can be programmed using Genie Medical BAHS 2022.1 fitting software. The software can be used alone or with NOAH.

Software is distributed on USB and DVD.

Wireless programming devices such as Noahlink wireless and FittingLink 3.0 can be used for wireless programming.



M50504
Genie Medical
fitting software

Ponto 3, Ponto 3 Power, Ponto 3 SuperPower and Oticon Medical Streamer can be programmed using the Genie Medical 2016.1 fitting software. The software can be used alone or with NOAH.

An Oticon #3, HI-PRO #3 or NOAHlink #2 programming cable is used to programme all sound processors. Please see Genie Medical or contact your local sales representative for more information about how to order the programming cable.

Skull simulator

Skull simulator
(SKS10)

Interacoustics have developed a special skull simulator coupler for the Affinity. It offers clinicians the ability to perform technical measurements on the sound processor.*

**Please contact your local sales representative for more information.*

Notes

Because sound matters

Oticon Medical is a global company in implantable hearing solutions, dedicated to bringing the power of sound to people at every stage of life. As part of the Demant Group, a global leader in hearing healthcare with more than 16,500 people in over 30 countries and users benefitting from our products and solutions in more than 130 countries, we have access to one of the world's strongest research and development teams, the latest technological advances and insights into hearing care.

Our competencies span more than a century of innovations in sound processing and decades of pioneering experience in hearing implant technology. We work collaboratively with patients, physicians and hearing care professionals to ensure that every solution we create is designed with users' needs in mind. We have a strong passion to provide innovative solutions and support that enhance quality of life and help people live full lives – now and in the future.
Because we know how much sound matters.
