

squeezie®

ACBS GMS PBS

Description

A food for special medical purposes.

PKU squeezie® is an apple & banana flavoured, ready-to-feed phenylalanine free protein substitute containing essential and non-essential amino acids, carbohydrate, vitamins, minerals, trace elements and the long chain polyunsaturated fatty acids (LCPs); arachidonic acid (AA) and docosahexaenoic acid (DHA).

Indications

PKU squeezie is for use in the dietary management of Phenylketonuria (PKU) from 6 months to 10 years of age.

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

PKU squeezie (85g) = 10g PE

1. The daily protein substitute requirement is given as PKU squeezie.
2. Additional protein is provided from exchanges of natural protein in prescribed quantities, to provide phenylalanine, in controlled amounts, which is essential for growth and development.
3. Foods high in carbohydrate and fat, but low in protein, should be provided to supply the remainder of the energy.

Preparation Guidelines

1 Shake well.

2 Consume from spoon or direct from pouch.

Water or permitted drinks should be taken after PKU squeezie

IMPORTANT NOTICE

Must only be consumed by people with proven PKU under strict medical supervision.

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply the phenylalanine, fluid and general nutritional requirements.

Not for use as a sole source of nutrition.

For enteral use only.
